(54) Title: SECURITY DEVICE

WO 2005/047012 A1

(57) Abstract: A security device comprises a holographic or diffractive optically variable effect generating structure which, when viewed normally (20) i.e. perpendicularly to the plane of the device, replays at least one composite image, the composite image being defined by at least a pair of discrete image elements (21,22), the structure being such that at least two of the discrete image elements of the composite image have different optimal replay angles.
